Body Print

Max. # Colors: 5

Max. Dimensions: 8.5"W x 4.6"H
(full 360° wrap is possible... contact Tri-S)

Additional Artwork Recommendations

1. Please send the files in either Adobe Illustrator or PDF format. We can use other file types, but vector graphics provide the best quality print.
2. Please have all fonts outlined or embedded in the artwork file... this helps ensure you have the exact font, size, and style that you want.
3. We can print with any color in the Pantone+ Solid Coated series of colors. We guarantee color matching to be within +/- one PMS shade.
4. We can print with metallic gold, metallic silver, and Day-Glo colors. The ink is more expensive, so there is a little bit of an extra charge.
5. The text height for the government warning and other items required by the TTB should be no smaller than 2.0 mm high.
6. We recommend that any lines in the artwork should be at least 0.5 pt thick.
7. We'd be happy to generate a UPC barcode for you, just provide us with the registered number. Red or orange barcodes will not scan.
8. For multi-color prints, please allow for a registration shift of 1/16". All bottles are imperfectly shaped, which can cause the imprint to shift.
